Multimedia Information Extraction and Retrieval
Summer Term 2012
Exercise Sheet 4

Ralf Möller, Karsten Martiny

Exercise Session:
Thursday, May 10, 2012, 8.00-8.45, SBS95-D1025

1. Consider the following three documents:

   d_1:   "Shipment of gold damaged in a fire."
   d_2:   "Delivery of silver arrived in a silver truck."
   d_3:   "Shipment of gold arrived in a truck."

   and the query

   q: "gold silver truck"

   Perform LSI for this input (use a rank 2 approximation). As a result you should rank the documents in order of their cosine similarity (after LSI).
